VOL.1

SHOW DAILY

ASEAN
**SUSTAINABLE
ENERGY WEEK**

Co-located with

BX
BIO-TECH EXHIBITION

P&V
PUMPS & VALVES EXHIBITION

Officially supported by

กระทรวงพลังงาน
MINISTRY OF ENERGY

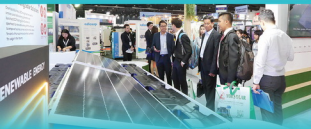

EGAT
Electricity Generating Authority of Thailand

Partner sponsor

FIMER

ASEAN's Most Comprehensive International Exhibition and Conference on Renewable Energy, Energy Efficiency, Environmental and Electric Vehicle, Boiler, Pumps and Valves Technology

ASEAN's Leading Energy Show is Now Opened!

ASE2020 is a combination of 4 events:

Together, they represent over 20 years of excellence in assisting Thai and ASEAN energy transition and development. The show is also co-located with Boilers Asia 2020 and Pumps & Valves Asia 2020 - ASEAN's most comprehensive international exhibition of Pumps, Valves & Boiler Technology. Both are the only specialized events of their kind in the Kingdom. The show features technology that is closely related to energy and energy efficiency. This year, there will be over 50 important Seminars and International Conferences running in conjunction over the period with the show.

Post COVID-19, the energy industry is now facing new challenges with the need to adapt and thrive. ASE 2020 will provide an outstanding platform in supporting and driving the energy industry forward and providing support & assistance to the industry and businesses to overcome such challenges. The show will play a vital role in helping Thai and ASEAN and entrepreneurs to enhance business competitiveness, efficiency and cost-savings.

▼ The views on Thailand's Energy Outlook from leaders in the Thai Energy Industry:

Renewable energy is definitely the future of energy and it is important to move forward. The effects of energy usage from climate change when many countries have already prepared a recovery plan, but many countries still require additional investments. Thailand has an advantage in biomass or the use of smart technology that will include Solar cells or solar rooftop technology.

กระทรวงพลังงาน
MINISTRY OF ENERGY

Dr. Teerawat Sateubur
Chief Inspector General,
Ministry of Energy,
Thailand

Renewable energy is an important factor in production. In the long run it is still important; especially energy such as solar where the cost of solar technology is now cheaper. With a policy to promote the purchase of electricity among ourselves, renewable energy from biomass will also be important in driving the national economy. JGSEE supports the public and private sectors in related technologies and also human resource development - especially in matters of Sustainable Bio Economy, Energy and Environment for Smart Cities.

JGSEE

Dr. Sunee Pabua
Director, The Joint Graduate
School of Energy and
Environment (JGSEE),
King Mongkut's University
(KMUTT)

Technology disruption causes entrepreneurs to keep adopting and adjusting at all times. The government has helped to support the reduction of restrictions. Some government energy policy goes well with the private sector such as using technology in the National Digital Energy platform and the reform of the electricity industry structure so as to make it more competitive. If the government have clear guidelines and policies, entrepreneurs are ready to support and drive forward.

Mr. Naithe Shirsrasana
Vice Chairman-Biomass Energy,
Renewable Energy Industry Club,
The Federation of Thai Industries

Renewable energy will come to be Future Energy, with the 1st generation energy going to the second generation; the Electricity Generating Authority has been supporting a policy from the Ministry of Energy with an emphasis on improving transmission lines to support renewable energy such as Floating Solar by using dams as a storage agent. EGAT is also supporting the energy sector in terms of Energy Storage and E-mobility.

Mr. Petana Sangruchajana
Deputy Governor Strategic,
Electricity Generating Authority
of Thailand (EGAT)
